Plant Care Guide

Simple steps for healthy , happy plants

Bird's Nest Snake Plant

(*Sansevieria trifasciata* 'Hahnii')

The Bird's Nest Snake Plant, also known as *Sansevieria trifasciata* 'Hahnii', is a compact and low-growing variety of the popular Snake Plant. It features short, rosette-shaped leaves with dark green coloration and light green horizontal striping. Its compact size and attractive appearance make it a great choice for indoor spaces.

By Neha Kunal Deshmukh

Origin: West Africa

Care Level & Placement: Easy care, Indoor plant

Light

It can tolerate low light conditions but will grow best with moderate to bright indirect light. Avoid direct sunlight, as it can scorch the leaves.

Water

Water the plant thoroughly, and then let the top inch of soil dry before watering again. Be cautious not to overwater, as the plant is susceptible to root rot. During winter, reduce watering frequency.

Soil

Well-draining soil specifically formulated for succulents or cacti. A mix of potting soil, sand, and perlite works well to ensure adequate drainage

Fun fact

The Bird's Nest Snake Plant gets its name from the rosette shape of its leaves, which resemble a bird's nest. This compact variety is often used in small containers, terrariums, or as a ground cover in larger plantings.

Pet Friendliness

Bird's Nest Snake Plant is considered toxic to pets if ingested. If any ingestion occurs, seek veterinary assistance.

Stress Signs

Yellowing Leaves: Yellowing leaves can indicate overwatering or excessive moisture in the soil. Allow the soil to dry out more between waterings. Ensure the pot has drainage holes to prevent waterlogging.

Stunted Growth: If your Bird's Nest Snake Plant shows minimal or no new growth over an extended period, it may indicate insufficient light. Consider moving the plant to a brighter location, preferably with moderate to bright indirect light.

Leaf Curling: Curling or drooping leaves can be a sign of underwatering or low humidity. Check the soil moisture. Increase humidity around the plant by misting the leaves or placing a tray of water nearby.

Botanical Family: Asparagaceae

Botanical Name: Sansevieria trifasciata 'Hahnii'

Common Name: Bird's Nest Sansevieria, Hahn's Sansevieria
