Plant Care Guide

Simple steps for healthy , happy plants

Philodendron Heartleaf

(Philodendron scandens)

Philodendron Heartleaf is a popular trailing houseplant with heart-shaped, glossy green leaves. Its cascading vines make it an ideal choice for hanging baskets or as a tabletop plant.

Nook & Nature

By Neha Kunal Deshmukh

Origin: Tropical regions of Central and South America.

Care Level & Placement: Easy Care, Indoor plant

Light

Thrives in bright, indirect light but can tolerate low-light conditions. Avoid direct sunlight to prevent leaf scorching.

Water

Allow the top inch of soil to dry between waterings. Water moderately and avoid overwatering, as it can lead to root rot.

Soil

Well-draining, peat-based potting mix.

Fun fact

The Heartleaf Philodendron is not only a beautiful houseplant but also an air purifier, helping to remove toxins from the air.

Pet Friendliness

Philodendron Heartleaf is toxic to pets if ingested, so it's important to keep it out of reach of curious animals.

Stress Signs

Yellowing or browning leaves: Can indicate overwatering, underwatering, or exposure to direct sunlight.

Wilting or drooping leaves: May occur due to underwatering or lack of humidity.

Stunted growth or sparse foliage: Could be a sign of inadequate lighting or nutrient deficiencies.

Botanical Family: Araceae

Botanical Name: Philodendron scandens

Common Name: Heartleaf Philodendron, Sweetheart Plant
