Plant Care Guide

Simple steps for healthy , happy plants

Philodendron Moonshine

(Philodendron Moonshine)

Philodendron Moonshine is a beautiful houseplant with large, heart-shaped leaves that have a unique silvery-green color. Its foliage has a glossy appearance, giving it a moonlit glow, hence the name Moonshine.

Nook & Nature

By Neha Kunal Deshmukh

Origin: The tropical regions of South America.

Care Level & Placement: Easy Care, Indoor plant

Light

Thrives in bright, indirect light. Avoid direct sunlight to prevent leaf burn.

Water

Allow the top inch of soil to dry before watering. Water moderately and ensure good drainage to prevent overwatering.

Soil

Well-draining, peat-based potting mix.

Fun fact

The silvery-green leaves of Philodendron Moonshine can develop a metallic sheen when exposed to proper lighting conditions.

Pet Friendliness

Philodendron Moonshine is toxic to pets if ingested, so it's important to keep it out of reach of curious animals.

Stress Signs

Browning or yellowing leaves: This can indicate overwatering or underwatering.

Drooping or wilting leaves: May occur due to underwatering, low humidity, or exposure to cold drafts.

Slow or stunted growth: Could be a sign of nutrient deficiencies or inadequate lighting.

Botanical Family: Araceae

Botanical Name: Philodendron Moonshine

Common Name: Moonshine Philodendron
